

TOP BIM SERVICE PROVIDERS IN THE USA

How BIM is Transforming Architecture, Engineering & Construction

<https://biminfo.neocities.org/>

Tesla Outsourcing Services

Tesla Outsourcing Services is a leading provider of architectural, structural, and MEP BIM modeling. With a reputation for high-quality and cost-effective solutions, Tesla helps clients optimize project timelines, budgets, and efficiency.

Service Offerings

Architectural BIM

Structural BIM

MEP BIM

Clash Detection

Scan to BIM

Facility Management BIM

Notable Project

Tesla Outsourcing Services has worked on numerous architectural, structural, and MEP BIM projects across diverse industries, including healthcare, commercial, residential, and infrastructure. Below are some of the most noteworthy projects that showcase Tesla's expertise in BIM modeling and outsourcing solutions.

Why Choose Tesla Outsourcing Services?

- ✓ Cost-Effectiveness
- ✓ Scalability
- ✓ Compliance

AECOM

AECOM

AECOM is an architect, engineer and construction services provider worldwide that delivers the latest BIM services in various industries. Known for its infrastructure projects—airports, roads, and energy infrastructure—AECOM has established the BIM integration benchmark.

Notable Project

Los Angeles International Airport (LAX) Modernization – BIM played a crucial role in planning and construction.

New York City Transit Authority Infrastructure Work – Streamlined design and project execution.

<https://www.aecon.com/>

Gensler

Gensler is one of the world's largest architecture firms, known for its expertise in commercial buildings, urban development, and high-rise structures.

GENSLER

<https://www.gensler.com/>

Notable Project

Salesforce Tower, San Francisco – A high-rise skyscraper designed using advanced BIM methodologies

BIM for Office Spaces

Smart and sustainable work environments.

Mixed-Use Developments

Large urban projects combining residential, retail, and commercial spaces.

Sustainable BIM Design

Reducing environmental impact

HDR INC.

HDR Inc. specializes in BIM solutions for transportation, healthcare, and government infrastructure projects

Notable Project

Denver International Airport Expansion – BIM-driven design and planning.

Kansas University Medical Center – Healthcare facility designed using BIM.

BIM for Healthcare Facilities

Government Infrastructure BIM

BIM for Transportation

DPR CONSTRUCTION

DPR Construction uses state-of-the-art BIM systems to automate workflows, cost-effectiveness, and deliverability. It has a particular specialty in healthcare, commercial and residential sectors, and the emphasis is on quality construction and collaboration.

Notable Project

Stanford Hospital Expansion – BIM used for clash detection and cost efficiency

<https://www.dpr.com/>

ARUP

ARUP

Arup is an international engineering and design firm for sustainable architecture and infrastructure projects. The application of BIM for urban development large-scale projects they have done provides better project results with improved collaboration and project productivity.

Service Offerings

Urban BIM Development

Sustainable Architecture BIM

Large-Scale Infrastructure BIM

Notable Project

London 2012 Olympic Park
– BIM-driven planning and execution.

<https://www.arup.com/>

SKANSKA

SKANSKA USA

Skanska USA, the leading construction and project development company, uses BIM to save time, avoid waste, and meet project deadlines. Often used for commercial and healthcare infrastructure projects, Skanska sets the standard for combining BIM with green building.

Notable Project

University of California, San Francisco Medical Center – A BIM-modeled project that saved time and costs.

<https://www.usa.skanska.com/>

Turner

TURNER CONSTRUCTION

Turner Construction is a leading US construction management firm that integrates BIM across all phases of building projects.

Notable Project

World Trade Center Redevelopment, New York – BIM-driven construction for precision and efficiency.

<https://www.turnerconstruction.com/>

BIMxperts

BIMxperts is a BIM implementation and consulting firm, specializing in helping real estate developers and contractors integrate BIM into their workflows.

Notable Project

Chicago Residential Developments – BIM used to minimize design errors and accelerate construction.

BIM Implementation Consulting

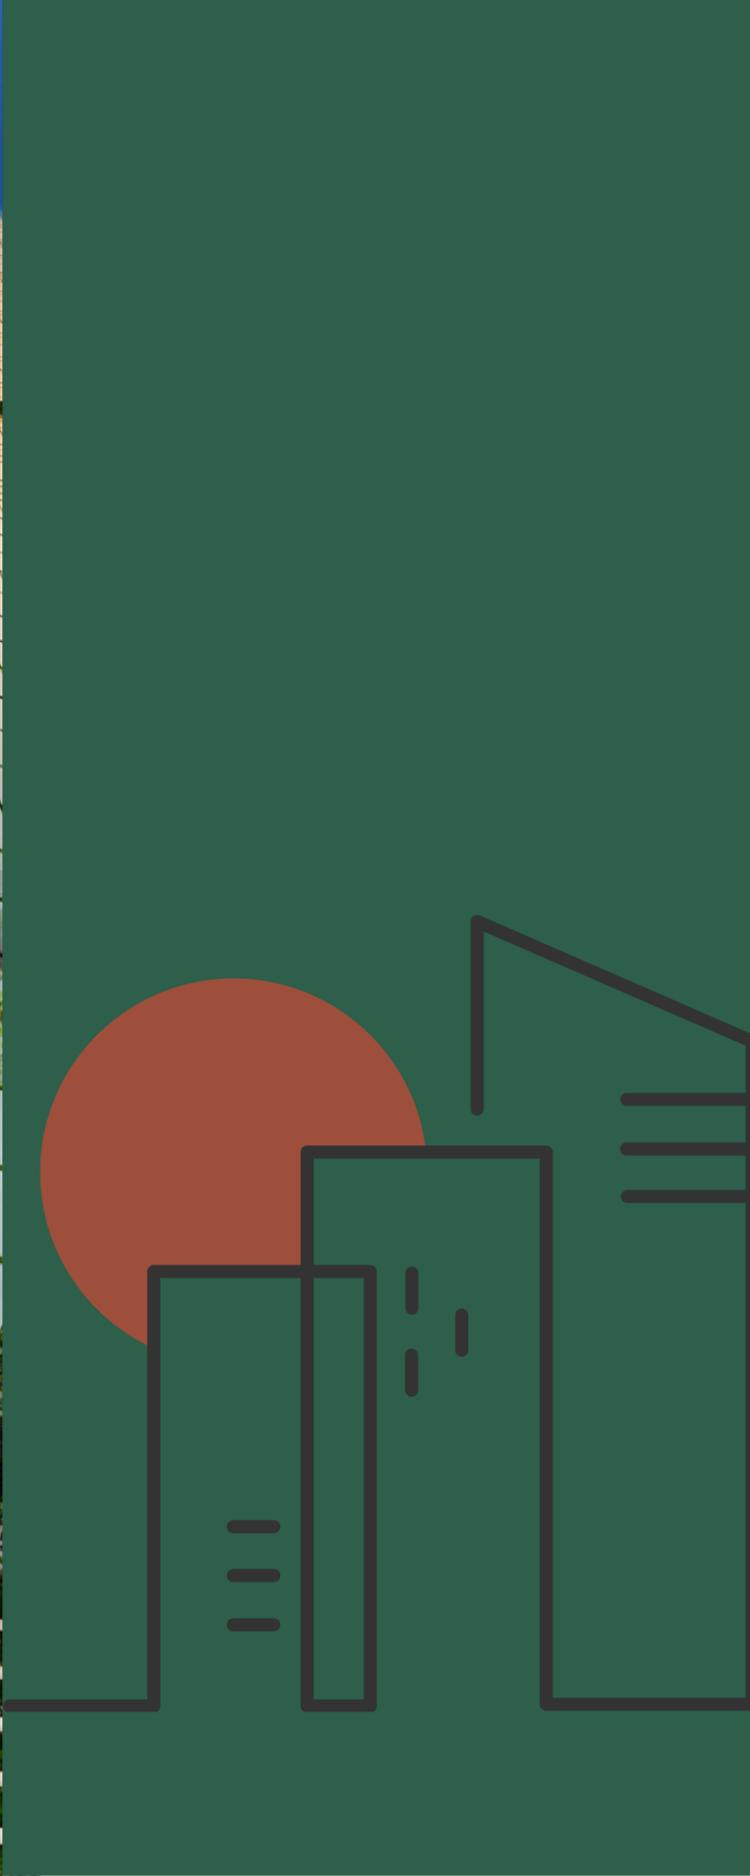

Training and software integration

BIM for Real Estate

Apartment complexes and housing developments

BIM for Hospitality Projects

Hotels and resorts

HOK is an international design, architecture, engineering and planning agency that pioneered BIM to design sustainable and energy-efficient buildings. They use BIM to be more environmentally friendly and make buildings perform better.

BIM for Sustainable Architecture

BIM for Transportation Hubs

BIM for Corporate Campuses

Notable Project

San Francisco International Airport Terminal 1 Renovation – BIM used to optimize construction processes and reduce the carbon footprint.
